

AERODYNE RESERVE CANOPY SOFT LINKS

Many customers ask if they can use the Aerodyne soft links in combination with other reserves, such as the Tempo. The answer is yes.

The Aerodyne reserve soft link, commercial part number C148510000 and technical part number P1487-01 has been tested and received a TSO C23d approval as a separate component. Consequently appropriately licensed parachute technicians can legally assemble the Aerodyne reserve soft link in combination with other TSO-ed parachute components.

Aerodyne received the TSO approval of the reserve soft link P1487-01 by letter from the US Federal Aviation Administration on 17 December 2002.

Aerodyne July 2003
