Status: Bulletin Upon Request

Identification: All ICON Harness/Container.
Part Number: P120, P125

Background: French Parachute Federation have certified it compulsory for all Harness/Containers used in France must have the AAD cutter fitted above the reserve spring loaded pilot chute.

The ICON Harness/Container was designed, tested and certified with the AAD cutter positioned below the reserve spring loaded pilot chute and positioned on reserve Flap #1. Aerodyne has also certified the AAD cutter to be positioned above the reserve spring loaded pilot chute. Both positions of the AAD are approved and effective. The Technical Bulletin is hence classified as optional.

Materials: Size E Nylon Thread
43mm TYPE 12 Webbing
25mm TYPE 3 Tape
Pictures:

1. Removal of Existing AAD Cutter Position

1.1 Reserve Flap #1

1.2 Remove Type 12 Webbing

1.3 Carefully un-pick Edge binding and cut TYPE 12 Webbing

1.4 Cut TYPE 12 Webbing
cont. - Removal of Existing AAD Cutter Position
